Focusing on Japan's foreign policy, this course will introduce students to critical issues regarding international relations in the Asia-Pacific region. On the one hand, the Asia-Pacific region has long attracted worldwide attention as an engine of economic growth. On the other hand, Asia's fragile security situation, symbolized by North Korea's nuclear adventurism and China's economic and military expansion, has concerned many states worldwide. That means Asia, where Japan is located, is a complex region with full potential for economic growth and a risk of conflict. This course examines international relations in Asia since WWII, including new security and economic dynamics.

Please note that all students are expected to actively participate in class discussions after each lecture and analyze issues from theoretical perspectives.

○授業の方法

Lectures will be provided at the first 50min, which class discussion by students will follow.
